SUMMARY

Data Analyst with **3+** years turning complex data into clear business decisions. Shipped analytics pipelines processing **1M+** transactions annually, built executive dashboards in **Tableau**, **Power BI**, and **SSRS**, and cut manual reporting overhead by **65%** through automation. Deep **SQL** expertise with a track record of improving query performance and data quality.

EXPERIENCE

Data Analyst & BI Developer

Jul 2023 – Dec 2025

Karrio (Startup)

Remote

- Reduced manual reporting effort by **65%** by redesigning **8+** workflows into automated pipelines, saving **20+** analyst-hours per month.
- Improved query performance by **42%** across **SQL Server**, **PostgreSQL**, and **Redshift** through indexing and query restructuring.
- Built **Tableau**, **Power BI**, and **SSRS** dashboards delivering executive KPI views for **4+** teams across Finance and Operations.
- Engineered **Python** and **T-SQL** pipelines processing **1M+** transactions/year, automating reporting end-to-end.

Data Analyst Intern

Sep 2022 – Apr 2023

Boat Star Foods

Remote

- Designed **Tableau** and **Power BI** dashboards for **supply chain** and inventory, giving 3 teams live KPI visibility.
- Wrote **T-SQL** queries and R/**Python** forecasting models, surfacing overstocking patterns for stakeholders.

EDUCATION

Bachelor of Computer Science, Minor in Economics

Expected Nov 2026

University of Victoria

Victoria, BC

Relevant: Database Systems, Software Engineering, Statistical Analysis

KEY ACHIEVEMENTS

Reduced Manual Reporting by 65%

Redesigned **8+** manual workflows into automated pipelines, saving **20+** analyst-hours per month.

Improved Query Performance by 42%

Optimized **SQL Server**, **PostgreSQL**, and **Redshift** workloads through indexing and query restructuring.

Built Dashboards for 4+ Teams

Delivered **Tableau**, **Power BI**, and **SSRS** KPI views across Finance, Operations, and Strategic Analytics.

Processed 1M+ Transactions Annually

Engineered **Python** and **T-SQL** analytics pipelines that automated end-to-end reporting cycles.

PROJECTS

Customer Experience Analytics Platform

Python, **R**, **T-SQL**, **PostgreSQL**, **Tableau**, **Apache Airflow**, **dbt**, **scikit-learn**, **pandas**, **Streamlit**

- Built an end-to-end analytics pipeline with **dbt** and Airflow, using incremental loads and schema tests for reliability.
- Delivered **Tableau** dashboards and a **Streamlit** app for demand forecasting, cutting simulated resolution time by **18%**.

E-Commerce Data Warehouse & BI Solution

T-SQL, **SQL Server**, **MySQL**, **Power BI**, **Python**, **Star Schema**, **ETL**

- Architected a star-schema **data warehouse** in **T-SQL**, improving query performance by **40%**.
- Delivered **Power BI** dashboards on KPIs and segmentation, lifting marketing efficiency by **25%**.
